Secretary Poster said that his call upon the conference was the result of an earnest desire to show his appreciation of the good work the conference was accomplishing. At the conclusion of his brief but happy address Secretary Foster took a seat near the presiding officer's chair and remained for some time as an interested spectator. A few minutes later Secretary Noble entered the church and took a seat beside Mr.

This subject is one that has long attracted the play.

"We shall have to do away with as greatly attracted the interest and adherence as greatly attracted the interest and adherence of the Linited States as that of any other." President, the brothers in black, as we have been called by the venerable Bishop Haygood, and also by his cherace bishop haygood, and also by Bishop Warren, a phrase to which we have no objections—the bishops and delegates of the A. M. E. church—the A. M. E. Zion church and the Colored M. E. church—have held a meeting and decided now we say to all of our brethren in black. come go with us and we will do you good, for the Lord hath spoken good concerning the brethren in black.

When the applause aroused by Elshep Way-

taries of the conference.

Dr. Snape referred to the welcome change that had taken place since the last ecumenical conference. "At the ecumenical conference in 1881," he said, "the social problems of the day had but small place in the proceedings. Per-mission was then obtained, but not without difficulty, for the introduction of a resolution in favor of international arbitra-tion. The resolution I had then the privilege of moving was seconded by the late Bishop Simpson, whose sainted memory will long be cherished. At our present assembly progress may be noted by the fact that the subject of that resolution has been accorded a prominent place in the official program.

Since 1881 the settlement of international disputes by arbitration has assumed in-creasing importance and has been adopted by

In the very city in which this conference was held a convention of representatives of the republics of the whole American continent was held as recently as hat year at the invitation of the government of the United States. At the pan-American continent was held as recently as fast year at the invitation of the government of the United States. At the pan-American congress eighteen governments were represented, and the congress declared that "the republics of America hereby adopt arbitration arbitration because and to such a spirit international arbitration has none, or if any, a remote and difficult application.

Through Mr. Blaine, the Secretary of State for the United States government, the congress suggested that the European governments should enter into a similar trenty; but thus far Switzerland has been the only one of the European powers that has given a favorable reply. Other governments, notwithstanding that several of their parliaments by resolution had declared in favor of international arbitrations have also also been the only one of its special attention. Let me, therefore, say simply this; that for myself, temporating in a place of influence in this country, and much more for the great body of citizenship to solve the deave of America for peace with that several of their parliaments by resolution had declared in favor of international arbitration, have shelved the proposal by merely acknowledging the receipt of Mr. Blaine's communication. It is greatly to be regretted that among the governments which have ignored the proposal is that of Great Britain. The more so because in the arbitration debate nored the proposal is that of Great Britain. The more so because in the arbitration debate in the house of commons in 1873 the then prime minister (the Eight Hon. W. E. Gladstone) said "Frevidence had endowed England and America also with increased advantages and facilities for the propagation of the principle of arbitration."

must be established. SUPPLEMENTARY REMARKS. Brief supplementary remarks were made by Bishop Newman, who took the ground that the only way war could be abolished was through the spirit of God and His love.

A distinction must be made between the selfish motive of patriotism and the unselfish motive of philanthropy. He suggested the foun-dation of a supreme court of the world, with a chief justice and associate justices, before whose bar the nations of the earth must appear for the settlement of their difficulties. He did not believe in the disarmament of the nations

Mr. J. Henry Farmer-Atkinson, M. > PLEASED WITH THE SPEECH. British Delegates Much Impressed by the President's Utterances.

There was nothing half-hearted in the applause which freely punctuated President Harrison's address in the conference today. The audience was composed of people of whom a majority were eminent in the oratorical profession, and they were quick to recognize the power of the Total Abstinence Soc President's utterances. From the opening sentence to the last word the conference was critical, and in spite of their keenness they frankly declared that there was nothing to apologize for, nothing to condemn.

Innumerable were the expressions of delight that poured from the lips and hearts of all the delegates, but especially warm and interesting were the comments of those whose homes are in lands other than this. They were accurappointed this afternoon to visit the great gun foundry of the United States at the navy yard. tomed, if ever, to seeing the governing powers from afar off, and whenever royalty parades in public there is much pomp and military dis-

The Rev. E. Lloyd-Jones, the eminent and eloquent Welsh preacher, said to a Star reporter: "My visit to America has realized the consummation of my highest ideals in the presence and the magnificent speech of your President. I should say that every rational Englishman will return to England feeling that a republic is the only true form of government. Never have I heard a man so expressing the heart of Chrisa man so expressing the heart of Christianity, and if his position was simply the result of the accident of birth I would never have expected such a deliverance. The welcome he gave Methodism at the White House would have been impossible at Windsor. If you rolled up all the kings and queens we ever had since the dever queens we ever had since the days of the conqueror down to the Prince of Wales you would not make so fine a man as President Harrison, nor could you get out of the com-posite such an able and courageous speech as that we heard this morning. I venture to say that more Methodists in one day have seen and been welcomed by the Presi-dent of the United States than in fifty years have been recognized and introduced to mem-bers of the royal family."

MR. BLAINE ON THE TARIFF. He Says He is Satisfied With the Law as It

An Ohio editor having written to Mr. Blaine that the democratic papers were parading him as an opponent of the McKinley bill, he replies as follows: AUGUSTA, Mr., October 14, 1891.

To Hon. John Hopley, esq., editor of the Journal, Bucyrus, Ohio: My Dear Sir: You inform me that the demo

cratic papers in your town and many democratic papers throughout Ohio keep the following paragraph standing in type: "But there is not a section or line in the en-

tire bill [McKinley tariff] that will open a market for another bushel of wheat or another barrel of pork .- James G. Blaine to Senator Frye, July 11, 1890."

Free, July 11, 1890."

This sentence is garbled and taken from its proper connection. It creates a wrong impression. What I did say is the following:

"I do not doubt that in many respects the tariff bill pending in the Senate is a just measure and that most of its provisions are in accordance with the wise policy of protestion. cordance with the wise policy of protection, but there is not a section or a line in the entire bill that will open a market for another bushel

bill that will open a market for another bushel of what or another pound of pork."

The letter in which this paragraph occurs was written to Senster Frye on July 11, 1890, and the McKinler bill did not become a law until October 1—nearly three months thereafter. In my letter to Senator Frye I objected to the bill because it did not contain a reciprocity cluse, which would provide a market for wheat and pork, for other products of the farm and for various fabrics. Before the bill was finally passed the reciprocity clause was inserted, and a large addition was made to the free list. It wis, therefore, be seen from what I said in my letter that the objection which I made to the McKinley bill was enticely removed before the bill became a law. Let me further say that the reciprocity clause has further say that the reciprocity clause has given ample market for many barrels of flour

and many pounds of pork.

Brazil, some months since, entered into a treaty by which many American articles are admitted free. Flour is made free and pork is
